

# Veradyn Tractor Rollover Alarm Installation Instructions

- 1) Identify a mounting surface. Surface should meet the following criteria.
  - Parallel to ground
  - Close to driver
- 2) Using bolts or sheet metal screws mount the alarm box to mounting surface. See box for orientation. (Black sticker)
- 3) Connect Red(power) to 12V on tractor.
- 4) Connect Black(ground) to tractor ground.
- 5) Find a mounting surface for the LED warning light and mount warning light
- 6) Run and hide wires for led light.
- 7) Connect LED light the the connector.
- 8) Make sure all wires are hidden/tied in a safe wear and pinch free environment.
